NOTICE on energy-saving measures at CIU

The Govt. of Bangladesh stressed the need for austerity in electricity consumption as rising costs forced a rollback in power production.

To overcome the situation, we are urging everyone to be economical in their use of electricity and energy. Below please find some recommendations from the CIU administration to cope up with the situation;

- i) Turn off all electrical equipment when not in use;
- ii) Switch off the computer, laptop, projector, air conditioning system (AC), lights, fans etc. during interval between the classes. School Managers are hereby given the responsibility to ensure it through Housekeepers & other support staff;
- iii) Setting thermostats at 25 degrees Celsius at office and class rooms during the weekdays; and
- iv) Any violation of the aforementioned energy-saving measures will be treated as per Code of Conduct of the CIU.

Thank you.

On instruction of the Vice Chancellor

Cumar Doyel DEY
Director, Administration
